THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. The autumn Leipzig Fair was held this year from 7 to 17 September 1952. Some information on the exhibits of small electrical instruments is given below.

2. General

All branches of electrical work were very poorly represented at the Fair. Exhibitions of heavier machinery were much more in evidence. The number of new East German exhibits in the electrical field was very small. In the field of measuring instruments, no improved models were noted except one from Apparatewerk Treptow (SAG Kabel), which showed a light scale apparatus (Licht-markengerate) of increased accuracy (class 0.2).

3. The USSR

A number of Russian exhibits in this field were actually East German models, the first sample models having been built in Germany and sent to the USSR, where they were no doubt copied. These were the following:

Russian Type No.	Instrument	Developed by
E 113/1	Ammeter and voltmeter	? (Germany)
M 82	Milliammeter and voltmeter	SAG Kabel: EFEM (= NTF-4)
M 80	Voltammeter(class 0.5 & 0.2)	"
M 55	Voltmeter and ammeter	? (Germany)
AMV	Voltmeter	"
AST-V	Astatic voltmeter	"
AST-D	Wattmeter	"
EF	Microfaradmeter	Oszillographengeratetwerk Zwoenitz, (formerly Siemens & Halske and formerly SAG Kabel), Zwoenitz, Saxony
E 32	Synchroscope	? (Germany)

An ELA ammeter was shown by the Russians.¹

25X1 Comment. The ELA ammeter was not recognized as being of German origin and may well have been entirely developed by the Russians.
